The Airbus A320

The **Airbus A320** is a short to medium range commercial passenger aircraft manufactured by Airbus. It was the first airliner with a digital fly-by-wire flight control system, where the pilot controls flight surfaces through the use of electronic signals rather than mechanically with pulleys and hydraulic systems.

After the initial success of the A300, Airbus targeted the market segment that was occupied by the 1960s designed Boeing 727 & 737. Airbus designed an aircraft with a fuel burn of only around 50% of the 727.

The A320 first flew in 1984 and was commercially launched in 1988. Unlike the earlier Airbus A300, it sold strongly from the outset and has been the fastest-selling airliner in the world for several years.

The A320 is perhaps best known as the first airliner to introduce a fly-by-wire flight control system - where control inputs from the pilot are transmitted to the flying surfaces by electronic signals rather than mechanical means. Apart from a small weight saving, the advantage of Airbus' fly-by-wire is that as it is computer controlled, an inbuilt flight envelope protection makes it virtually impossible to exceed certain flight parameters such as G limits and the aircraft's maximum and minimum operating speeds and angle of attack limits

We fully recommend the Airbus A320 Type Rating to any candidate wishing to improve their chances of gaining employment on one of the worlds most popular aircraft types.

The A320 accommodates 150 passengers in a typical two-class cabin layout, and has a 3,000 nm/5,550 km range. It can be powered by CFM56-5 or IAE V2500 engines

BASIC DATA

ENGINES
CFM56-5 or IAE V2500

RANGE
5700 km or 3000nm

MAX MACH NUMBER
0.82 Mach

MAX TAKE OFF MASS
73,500 Kgs

MAX FUEL CAPACITY
23,860 Litres or 6,300 gallons

OVERALL LENGTH
37.57metres

WING SWEEP
25 degrees

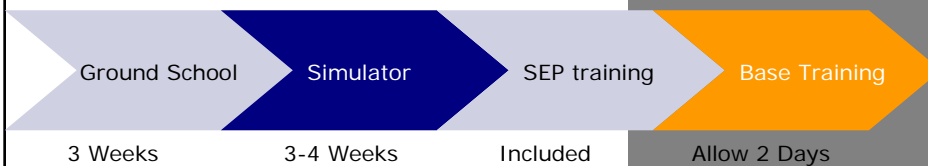

Jet Flight Training

Brochure & Price List

Airbus A320 Type Rating Training (Includes: Ground School – Simulator – Aircraft Base Training)

- All Related Manuals and checklists and access to our online training website.
- **14 days Total Ground school as follows:-**
 - 12 days CBT (Computer Based Training)
 - 10 hours of VPT training (Visual Procedural Trainer)
 - 4 hours FMGS training
 - 4 hours ECAM training
 - 1 day of training of Flight planning and Performance
 - 1 day of training of Loading, Mass and Balance, All Weather Operations
 - All examinations with our own examiner
- 16 hours fixed base simulator (4 days)
- 37 hours full flight simulator (9 days)
- Includes 1 hour of Aircraft Base Training, including 6 landings which also includes 1 hour of simulator training, pre Base Training.

Price £19,720.00 GBP + VAT

*Please note that the periods of training are not continuous. Jet Flight & Instructor Training Ltd will endeavour to keep these gaps to a minimum, however we can not be held accountable for circumstances outside of our control.

Line Training Packages on Airbus A320 (300hr - 500hr packages)

We can arrange and place students into one of our preferred line training providers to enable our students to get those vital 'HOURS ON TYPE'.

As you will be flying a passenger aircraft, safety is a big priority and being released to Line Training requires a student to meet high standards throughout the course. We would normally expect a student to have progressed well on the Type Rating course, and have achieved a good pass during all stages of the Type Rating Course, but specifically at the final Licence Skill Test (LST) in the simulator, and during Base Training in the Aircraft.

Our partner airlines are based throughout Europe, so all of our packages include the following in the cost of the package:- Licence Endorsement if required by local state, Operator Conversion course, usually being 5 to 10 days of ground school, and ID passes.

We offer the option of 300hr or 500hr line training packages, however we suggest that for most students the 300 hr package is appropriate, as this is a pre entry requirement for most airlines within Europe, and the 500hr package is generally suitable for those wishing to gain employment in the Far East including India.

The current lead time to join a line training course is 2 months. Please apply online at our website to join the Line Training program at:- <http://www.jettraining.net>

Airbus A320 - 500hrs	\$ 47,500
Airbus A320 - 300hrs	\$ 33,500

Prices subject to change due to the exchange rate. No VAT payable.
Discounts may be available to students who conduct their Type Rating with Jet Flight Training
