The Airbus A320 and Family

The **Airbus A320** is a short to medium range commercial passenger aircraft manufactured by Airbus. It was the first airliner with a digital fly-by-wire flight control system, where the pilot controls flight surfaces through the use of electronic signals rather than mechanically with pulleys and hydraulic systems.

After the initial success of the A300, Airbus targeted the market segment that was occupied by the 1960s designed Boeing 727 & 737. Airbus designed an aircraft with a fuel burn of only around 50% of the 727.

The A320 first flew in 1984 and was commercially launched in 1988. Unlike the earlier Airbus A300, it sold strongly from the outset and has been the fastest-selling airliner in the world for several years.

The A320 is perhaps best known as the first airliner to introduce a fly-by-wire flight control system - where control inputs from the pilot are transmitted to the flying surfaces by electronic signals rather than mechanical means. Apart from a small weight saving, the advantage of Airbus' fly-by-wire is that as it is computer controlled, an inbuilt flight envelope protection makes it virtually impossible to exceed certain flight parameters such as G limits and the aircraft's maximum and minimum operating speeds and angle of attack limits

We fully recommend the Airbus A320 Type Rating to any candidate wishing to improve their chances of gaining employment on one of the world's most popular aircraft types.

The A320 accommodates 150 passengers in a typical two-class cabin layout, and has a 3,000 nm/5,550 km range. It can be powered by CFM56-5 or IAE V2500 engines

BASIC DATA

Engines

CFM56-5 or IAE V2500

Range

5700 km. 7400 km A321LR

Max Mach Number

0.82 Mach

Max Take Off Mass

78,000 Kgs

Max Fuel Capacity

23,860 Litres or 6,300 gallons

Overall Length

37.57metres

Wing Sweep

25 degrees

Jet Flight Training

Course Information & Price List

Airbus A320 Type Rating Course (Includes – Ground Phase - 52 hours Simulator Training – LST Aircraft Base Training)

- All Aircraft Manuals (FCOM,FCTM,QRH, AFM, Performance) and Checklists and SOP's. Access to our online training website.
- **Online or Ipad Computer Based Training (CBT) and examinations:-**
 - 100 hours of Computer Based Training
 - 14 hours of VPT training (Visual Procedural Trainer)
 - FMGS training
 - ECAM training
 - Flight planning and Performance..
 - Loading, Mass and Balance, All Weather Operations
 - All examinations conducted with our own examiner
- **12 Days of Groundschool with an experienced A320 Type Rated Instructor**
- **16 hours Full Flight simulator without motion (4 days)**
- **36 hours Full Flight simulator training including LST (9 days)**
- **Aircraft Base Training to include 6 take-off and landings.**

Price: £12,800.00 + VAT
7200 Euros for Aircraft Base Training

A320 Course Program

Groundschool 12 Days	Simulator Training 13 Days	SEP Training Included	Aircraft Base Training 1 Day
--------------------------------	--------------------------------------	---------------------------------	--

*Please note that the periods of training are not continuous. Jet Flight & Instructor Training Ltd will endeavour to keep these gaps to a minimum, however we can not be held accountable for circumstances outside of our control.

Line Training Packages on Airbus A320 (500hr packages)

We are able to arrange line training to enable our students to get those vital 'HOURS ON TYPE'.

As you will be flying a passenger aircraft, safety is a big priority and being released to Line Training requires a student to meet high standards throughout the course. We would normally expect a student to have progressed well on the Type Rating course, and have achieved a good pass during all stages of the Type Rating Course, but specifically at the final Licence Skill Test (LST) in the simulator, and during Base Training in the Aircraft.

Line training is currently available in Eastern Europe and the Far and Middle East. All of the packages include the following in the cost of the package:- Licence Endorsement if required by local state, Operator Conversion course, usually being 5 to 15 days of ground school, and ID passes.

Options do vary but 500hr line training packages are the normal as this is a pre entry requirement for most airlines within Europe, and the 500hr package is generally suitable for those wishing to gain employment in the Far East including India.

The current lead time to join a line training course varies and is dependant on the time of year and whether the airline has other commitments but 4 to 8 months is typical. Please apply online at our website to join the Line Training program at:- <http://www.jettraining.net>

Airbus A320 - 500hrs

Please email contact@jettraining.net for latest prices

**Prices are subject to change due to Airline Pricing.
Line Training is only available to Jet Flight Training students.**

Employment Opportunities

Jet Flight & Instructor Training Ltd works closely with many Airlines, who look at all of our trainees with a view to employment, however it must be stressed that employment can never be guaranteed.

When airlines are wishing to recruit they are looking for candidates that have performed well throughout all aspects of their course, this includes performance during Ground School, the simulator phase of training and Aircraft Base Training.

We are also seeing an unprecedented demand for qualified European pilots from airlines outside of Europe including rapid expansion in the Asian and Eastern European markets at present. We are in the process of bridging relationships in this area.

Pilots trained at Jet Flight Training are now flying for the following Airlines.

Course Dates

We now publish our scheduled Airbus A320 course start dates on our website but we can schedule a course based on specific company or individual requirements for 2 or more candidates.

Training Centre Visits (Everybody is Welcome, bring the family !).

If you would like to visit our Training Centre here in the UK please let us know and we can arrange to show you around.

Course Application and Further Information

If you would like to attend one of our course's, please send your details by email to the address below:

contact@jettraining.net

Your contact at Jet Flight Training is Mike Gibbs and he can answer all of your questions.
